MENTOR-LED UI/UX DESIGN PROGRAM

UI/UX Design Course with Mentor-Led Live Projects

A hands-on UI/UX design training program by Lollypop Academy — built by the design leads at Lollypop Studio to turn beginners into job-ready UI/UX designers through real client-style projects, not just theory.

1,000+
Clients served by Lollypop Studio mentors

50+
Global design awards

100%
Hands-on, project-based learning

About the UI/UX Design Course

Lollypop Academy's **UI/UX Design Course** is a mentor-led, project-based training program designed for students, career switchers, and working professionals who want practical, job-ready UI/UX design skills. Unlike generic online courses built around pre-recorded videos, this program is led live by design leads from **Lollypop Studio** — an award-winning UI/UX design agency that has worked with 1,000+ clients across fintech, healthcare, e-commerce, and SaaS.

The course is built around one core idea: designers learn best by **designing real products, not watching lectures**. Every learner works on live, mentor-guided projects that mirror actual client briefs, giving them a portfolio of real UI/UX case studies by the time they graduate — not just certificates.

Why Choose a Mentor-Led UI/UX Design Course

- ✓ Live sessions led by senior UI/UX design leads, not recorded playlists
- ✓ Real, hands-on projects instead of one-liner design exercises
- ✓ Direct mentor feedback on every wireframe, prototype, and design decision
- ✓ Practical training in user research, UX writing, and interaction design
- ✓ Portfolio-ready UI/UX case studies built during the course
- ✓ Guidance from mentors who actively design for real clients at Lollypop Studio

> *"Most design courses teach you to follow tutorials. Lollypop Academy teaches you to think like a designer — through live, mentor-led projects that mirror the real UI/UX design process."*

UI/UX Design Curriculum Highlights

Module	What You Learn
UX Foundations	User research, personas, journey mapping, and problem framing for real UI/UX design projects

UI Design Principles	Visual hierarchy, typography, color theory, and design systems used in professional UI design
Wireframing & Prototyping	Low-fidelity to high-fidelity prototyping using industry-standard design tools
Live Mentor-Led Projects	End-to-end UI/UX design projects guided by Lollypop Studio design leads, with iterative feedback
Usability & Testing	Heuristic evaluation, A/B testing basics, and usability testing methods for UI/UX design
Portfolio Building	Structuring UI/UX case studies that recruiters and hiring managers actually want to see

Who Should Join This UI/UX Design Course

Aspiring UI/UX Designers

Beginners who want structured, mentor-led UI/UX design training instead of scattered tutorials.

Working Designers

Graphic or web designers upgrading into full UI/UX design roles with live project mentorship.

Career Switchers

Professionals moving into UI/UX design who need real project experience and portfolio support.

Students & Freshers

Design and non-design graduates seeking hands-on UI/UX design skills before entering the job market.

What Makes Lollypop Academy Different

Lollypop Academy is built on the same research-driven design process used by **Lollypop Studio**, a global UI/UX design agency recognized with 50+ design awards. Instead of theoretical modules alone, learners get **mentor-led live projects**, direct design critiques, and exposure to how real UI/UX design teams work — from discovery and research to final handoff. This mentor-led, project-first approach is what helps learners build genuine confidence and a strong UI/UX design portfolio, not just a completion certificate.
